Your Review:

This book is basically a poem about President Nelson Mandela of South Africa and the great impact he's made on the citizens of the world. Dr. Maya Angelou uses vivid language to describe how America took the news of President Mandela's death, and also to describe what he has done for his country. "His Day is Done" is a moving poem that speaks for all of us and pays a great respect and vibe of sympathy from America to South Africa. This book is a quick read and I suggest it for readers who enjoy poetry with a hint of biography.
