Write a review of the book, including plot points, if you wish:

During the summer of 1894 sequoia trees were being milled for lumber, and Francie a fifteen year old girl finds a sequoia stump and in the stump she discovers a note, and immediately she sees that its her sisters handwriting, the same sister that died six years before. Francie wonders if her sisters secret is still important, but soon her search for truth puts her life in danger and she may have to risk riding the flume.
