

The Learnability Project

Website <http://www.indiana.edu/~sndlrng/>
Indiana University Department of Speech and Hearing Sciences

Address 200 S. Jordan Ave.
Bloomington, IN 47405

Description The Learnability Project is a research program sponsored by the National Institutes of Health. The goal of the Learnability Project is to explore how children learn sounds and words, and to develop new teaching methods to facilitate language learning. We are currently recruiting children, ages 3 to 7, to participate in speech and language programs at no cost to families. Children receive a free speech and hearing screening to determine if they are eligible for the following programs: Speech sound awareness to improve listening skills Speech sound treatment to improve spoken skills Please send email or call for an appointment.
